## **1. INTRODUCTION**

### **1.1 Purpose**

- This Web Application provides facility to conduct online examination world wide.

- It saves time as it allows number of students to give the exam at a time and displays the results as the test gets over, so no need to wait for the result. It is automatically generated by the server.

- Administrator has a privilege to create, modify and delete the test papers and its particular questions.

- User can register, login and give the test with his specific id, and can see the results as well.

## **1.2 Scope**

- this system allow to student to give their exam at any palce.it s save paper and give result very fast.

## **1.3 Overview**

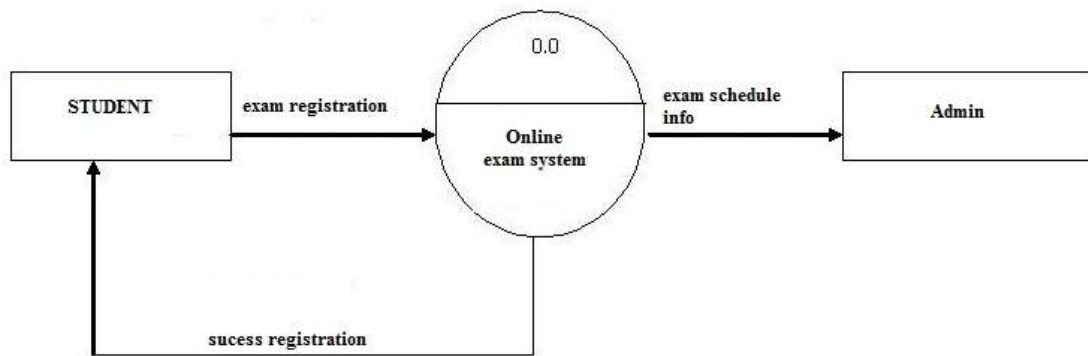

- this system provide an easy solution to the student to give exam online.

## **2. General Description**

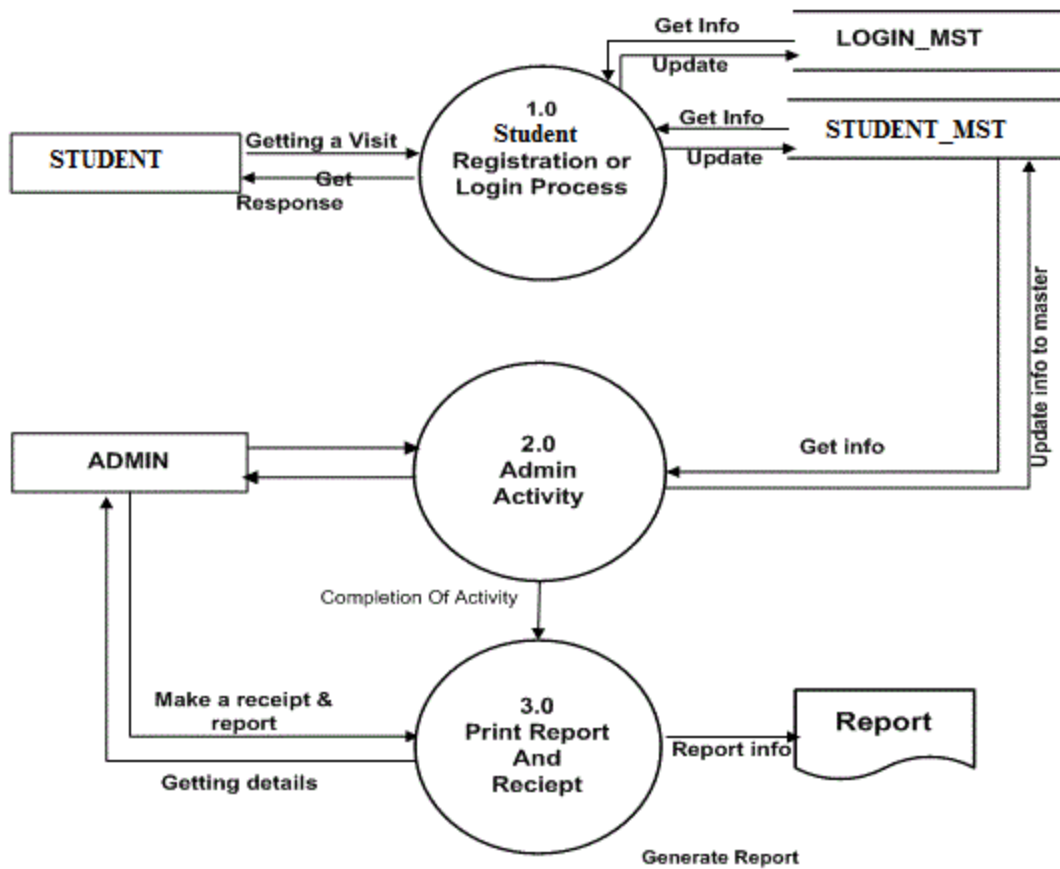

This Web Application provides facility to conduct online examination world wide. It saves time as it allows number of students to give the exam at a time and displays the results as the test gets over, so no need to wait for the result.It is automatically generated by the server.

Administrator has a privilege to create, modify and delete the test papers and its particular questions. User can register, login and give the test with his specific id, and can see the results as well.

## **2.1 User Manual**

This System should Help option in which how to operate the system should be explained. Also hard copy of this document should be given to the user in item form server.

## **3. Functional Requirements**

### **3.1 Description**

The Online Examination System is developed for handling the activities for various users such as student, staff, exam staff. Every teacher should have laptop with wireless internet connection.

### **3.2 Technical Issues**

This product will work on client-server architecture. It will be require an internet server and which will be able to run PHP application. The product should be support some commonly used browsers such as Internet Explorer, Mozilla Firefox. External interfaces include key board and mouse, enabling navigation s across the screens

#### **4. Interface Requirements**

Various Interfaces for the products could be

- Login form
- Examination form
- Result form
- C Language exam form
- C++ language exam form
- Operating system exam form
- Registration form
- Reports form

#### **4.1 GUI**

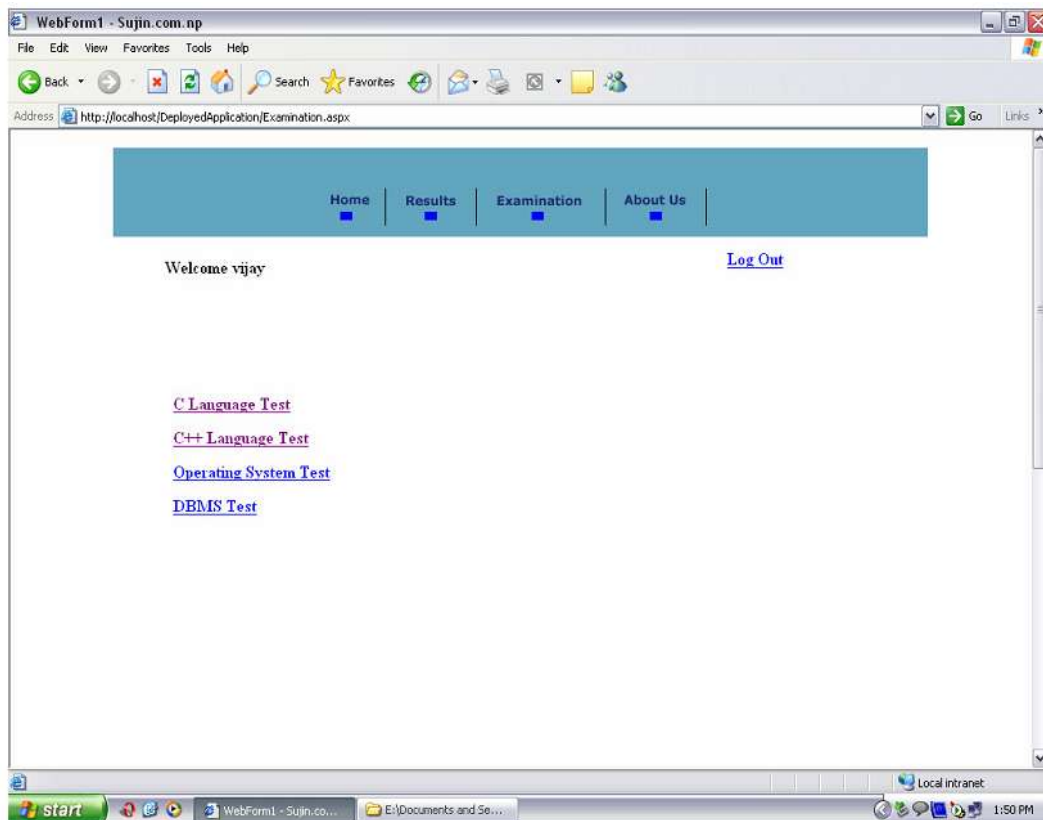

## 1. Log In Form

The screenshot shows a web browser window with the title "cLanguage - Sujin.com.np". The address bar displays "http://localhost/DeployedApplication/Login.aspx". The browser's menu bar includes "File", "Edit", "View", "Favorites", "Tools", and "Help". The toolbar contains icons for "Back", "Forward", "Stop", "Home", "Search", "Favorites", "Print", "Mail", "Run", "Find", "Go", and "Links".

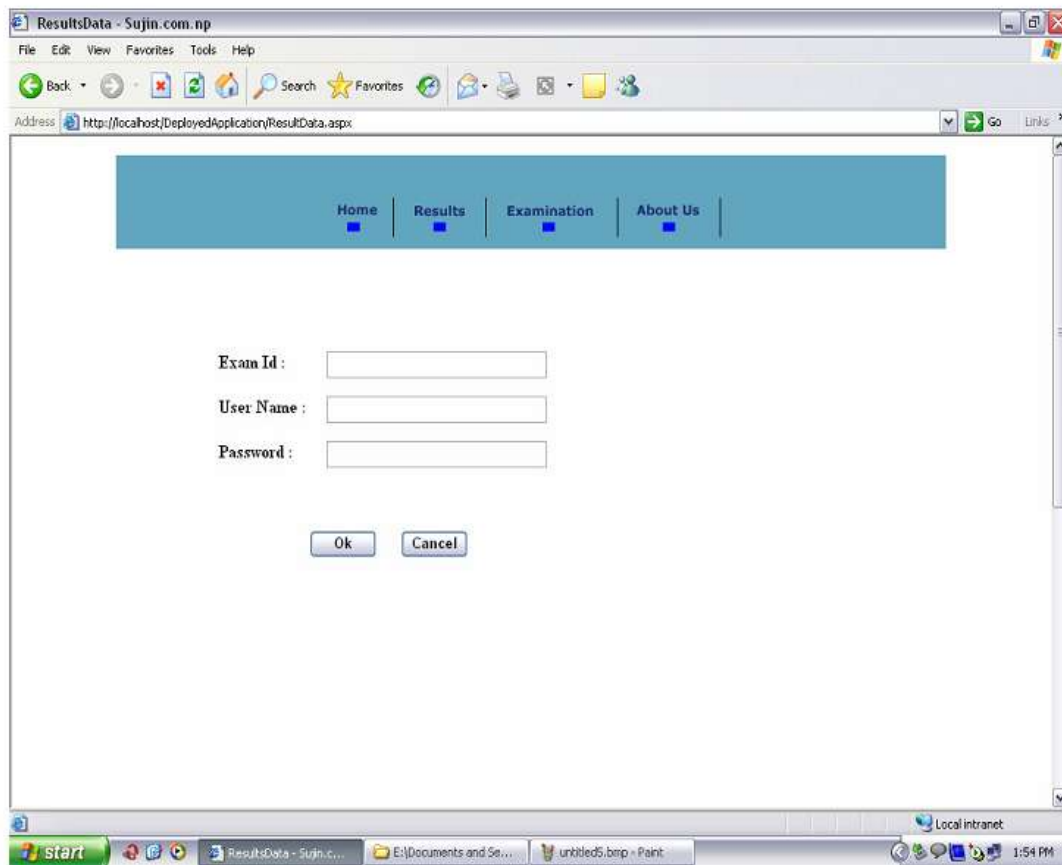

The main content area features a blue navigation bar with the following links: [Home](#), [Results](#), [Examination](#), and [About Us](#). Below this, the login form consists of two input fields: "User Name :" and "Password :". A "Log In" button is positioned below the password field. A link labeled "Register Now" is located below the "Log In" button.

The status bar at the bottom of the browser window shows "Done" on the left and "Local intranet" on the right.

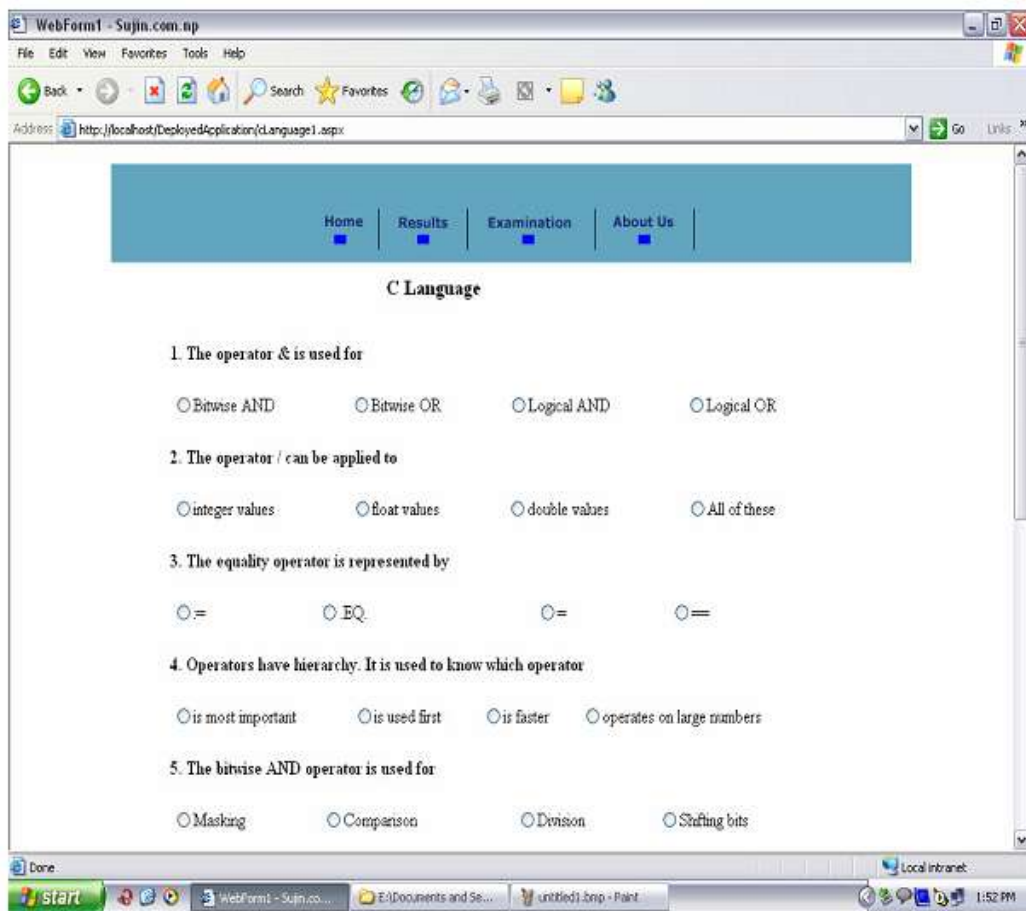

## 2. Examination Form

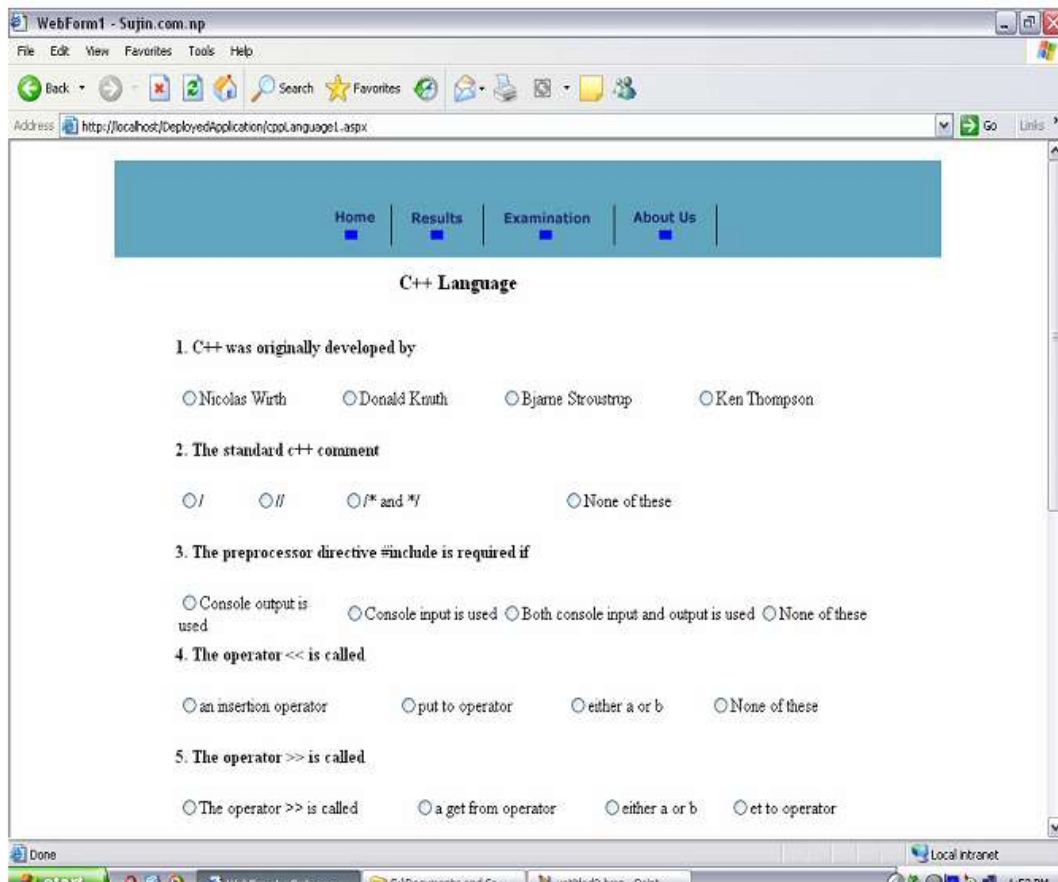

### 3. Result Form

#### 4. C language exam form

## 5. C++ LANGUAGE EXAM FORM :

## 6. Operating System Exam Form

The screenshot shows a web browser window titled "WebForm1 - Sujin.com.np". The address bar shows the URL "http://localhost/DeployedApplication/OperatingSystem1.aspx". The browser has a menu bar (File, Edit, View, Favorites, Tools, Help) and a toolbar with icons for Back, Forward, Stop, Reload, Home, Search, Favorites, and a Go button. The page content includes a navigation bar with links: Home, Results, Examination, and About Us. The main heading is "Operating System". There are five multiple-choice questions:

1. \_\_\_\_ runs on computer hardware and serve as platform for other softwares to run on  
☐ Operating System    ☐ Application Software    ☐ System Software    ☐ All
2. \_\_\_\_ is the layer of a computer system between the hardware and the user program  
☐ Operating environment    ☐ Operating system    ☐ System environment    ☐ None
3. The primary purpose of an operating system is \_\_\_\_  
☐ To make the most efficient use of the computer hardware    ☐ To allow people to use the computer    ☐ To keep systems programmers employed    ☐ To make computers easier to use
4. \_\_\_\_ transforms one interface into another interface  
☐ Program    ☐ Software    ☐ Data    ☐ None
5. \_\_\_\_ system is built directly on the hardware  
☐ Environment    ☐ System    ☐ Operating    ☐ None

The Windows taskbar at the bottom shows the Start button, several open applications (WebForm1 - Sujin.co..., E:\Documents and Se..., untitled3.bmp - Paint), and the system clock showing 1:53 PM on a Local Intranet.

## 9. Reports Form

## **4.2 Hard ware Requirements**

1. The application demands that all the PCs must be present in the internet .
2. Pc should be sufficiently fast with adequate memory at least 64 MB RAM and 2 GB hard –disk space is required to run this application.
3. Screen resolution of at least 800\*600 required to properly view the screen.
4. It should be support the printers

## **4.3 Software Requirements**

1. Any Window Operating System.
2. The PHP must be installed. For the database handling MYSQL must be installed.
3. The final application must be packaged in a set up program, so that the product can be easily installed on the clients-machine.

## **5. Performance Requirements**

- The E-mail should be sent within one hour after the registration.
- The system should support registration for examination maximum of Students.

## **6. Design Constraints**

The system should be designed within in 7 months.

## **7. Other Non Functional Attributes**

### **7.1 Security**

Application will allow only valid users to access the system. Access to any will application resource depend upon user's designation. There are two types of users namely Administrator and Student . Security is based upon the individual user ID and Password.

### **7.2 Reliability**

The application should be highly reliable and it should generate all the updated information in correct order.

### **7.3 Availability**

System will be available around the clock except for the time required for the back up of data.

### **7.4 Maintainability**

The installation and operation manual of examination management system will be provided to user.

### **7.5 Portability**

The application should be portable on any windows based system

## **8. Operational Scenarios**

There will be student database, examination database. The student database will contain students name, e-mail address, address, phone number, qualification.

The examination database contain exam date, time, exam hall ticket for student.

## **9. Preliminary Schedule**

This Product must be completed within 7 months.
